PROTECT YOUR SLED FROM THE ELEMENTS

KEEP YOUR SLED LOOKING NEW WITH A POLARIS COVER

- Keep snow and ice off of your sled in between days of riding
- Protect your sled from dirt and slush while trailering
- Protect from harmful UV rays that could fade your coloring over time
- Choose between premium polyester for maximum protection and trailering or the overnight cover for in between rides

THE POLARIS ADVANTAGE WHY SHOULD YOU CHOOSE A POLARIS COVER?

- 1. INTENTIONALLY DESIGNED** for your sled and features easy to use cinch strap technology for a secure hold and perfect fit
- 2. PREMIUM MATERIALS** provide advanced protection and lasting durability through the elements
- 3. RIDER-CENTRIC FEATURES** such as integrated zippers and straps make Polaris covers easy to use with quick access

OVERNIGHT/DUST COVER

Lightweight and packable. Ideal for overnight multi-day drops or parking in a shop.

3/4 COVER

This cover is ideal for overnight protection, when the sled is stored between rides and during trailering. Designed to fit over all windshield styles and all accessories. Does not cover the tunnel so you still have access to storage and racks.

FULL COVER

Full sled protection with perfect fitment for your model. Great for towing and off season storage. Zipper access to gas cap, and quick adjust cinch straps and hooks for tightening.

MATRYX OVERNIGHT COVER

- Protects sled from the elements when stored outside overnight
- Made of lightweight polyester that is easy to fold and store
- Ideal for overnight multi-day trips or parked in a shop

TRACTION & CONTROL

RIP WITH AN IRON GRIP

Whether you're replacing your carbides or looking to add more traction and control for enhanced performance, premium Woody's® stud kits and carbide runners are exclusively engineered for your Polaris snowmobile.

CONTROL FOR HOW YOU RIDE

TUNNEL PROTECTION

Required protection for when you stud, these "wear strips" protect your tunnel and vital cooling components from damage.

CARBIDES

Replacing or upgrading, add the right amount of ski control to match your track length, studding pattern and riding style.

STUDS

Choose the right length stud for your track lug and then select a pattern to best suit your riding style for a touch of added control to monster holeshots.

CARBIDE WEAR STRIPS

Carbides need to be sharpened or replaced periodically due to normal wear and use. Rocks, cement, pavement and road crossings all contribute to carbide wear.

3-4" CARBIDE

Perfect for sleds with a 121" track with 96 studs or less or sleds with 1" lugs taking corners at moderate speeds

6" CARBIDE

Ideal for sleds in the 136" track range with up to 1 1/4" lugs or shorter track sleds with more than 96 studs

8" CARBIDE

Best for ultimate-performance sleds with a 144" track or longer with paddles and/or the maximum amount of studs

FOUR KEYS TO TRACK SELECTION

LENGTH

The inside circumference of the track is calculated as the drive pitch multiplied by the number of track segments. It must be correct to the nearest inch for proper fit without additional modifications to the skid frame.

DRIVE PITCH

The drive cog center distance around the circumference of the cogs on the drive axle. It must match the existing track or the drive cogs must be changed.

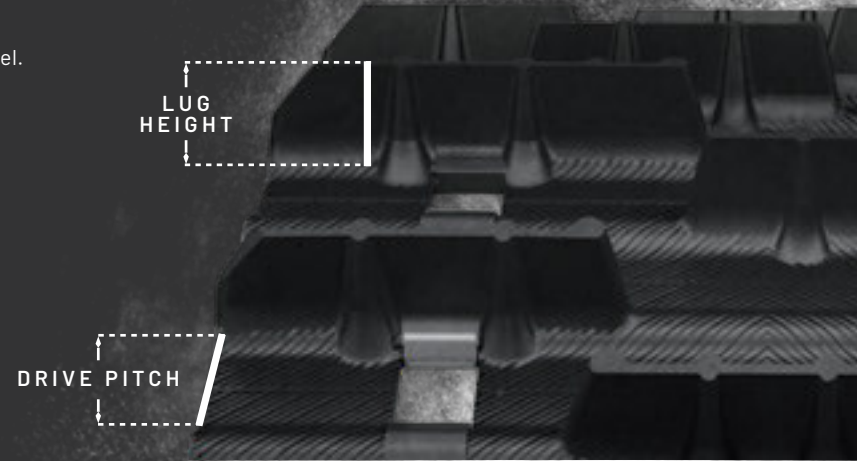

WIDTH

The measurement across the track governed by the width of the tunnel.

LUG HEIGHT

The distance lugs extend above the track surface.

- Trail: 1" - <1.5"
- On/Off Trail: 1.5" - <2"
- Deep Snow: 2" and greater

POLARIS ENGINEERED DRIVE BELTS

OUR INVESTMENT PER BELT

- 20,000 miles (32,187 kilometers) of field testing
- Thousands of dyno hours
- 18+ months of development (3,000+ design hours) per belt
- 1,200+ vehicle validation hours
- Collaboration with powertrain and clutch engineers

YOUR ADVANTAGE

- No clutch recalibration
- Less wear and tear due to heat
- Ensure maximum performance of your vehicle
- More time out riding, less time wrenching

PRO SERIES

WHY PRO SERIES

- Enhanced cord technology and proprietary rubber compounds
- New dynamic cog profile maximizes flexibility and keeps belt cool under high strain
- Engineered for best-in-market adhesion, wear resistance and overall durability

ADVANCED ADHESION TECHNOLOGY

WHAT IS ADHESION?

- The strength of the chemical bond between the belt cords and the adjacent rubber top and bottom cogs

WHY DOES IT MATTER?

- During high-speed driving and high engine torque, strong adhesion keeps the cords from popping out of the side and top cog from delaminating the belt
- A belt that's been tested with our OE specifications of 60 lbs of force is made specifically to handle the loads and speeds of our vehicles
- Any use of a belt with reduced adhesion will result in premature failure

*Belt dimensions are given in nominal dimensions. There is a +/- variance for all critical dimensions. Clutch setup must be inspected when a new belt is installed and should be adjusted if necessary. The drive belt is an important component in the CVT system. In order to achieve maximum efficiency from the converter, drive-belt deflection (tension), clutch offset and alignment must be adjusted properly. See your service manual for further details on drive-belt measurement inspection.

Read, understand and follow your owner's manual. Never operate a generator indoors. Generator exhaust contains carbon monoxide vapors and exposure can result in severe injury or death. Gasoline is highly flammable and explosive under certain conditions. Always use extreme care whenever handling gasoline.

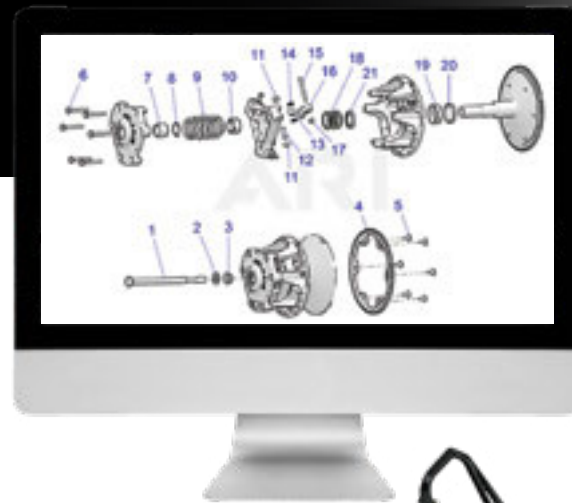

HIGH-PERFORMANCE SERVICE PARTS

When we're engineering our high performance components, we keep serviceability in mind. We build our products as a system so that anyone with the right tools and training can easily maintain their sled, get back to riding, where you belong.

Our engineers at Polaris create parts that push the limits, and are meant for the long haul. However, over time, your sled may eventually need service.

DESIGNED BY RIDERS FOR RIDERS

Polaris Riding Gear is high-quality outdoor gear designed for a wide range of riders, riding styles and other outdoor activities. It is intentionally designed to work together as a smart solution with the best fit and optimal comfort so that you can stay out longer, doing what you love.

Every Polaris riding jacket, bib, monosuit and boot is made with TECH54, an exclusive technology from Polaris.

Visit P. 72 to learn more.

HELMET
FACE THE DAY WITH CONFIDENCE.
The ideal snowmobile helmet will offer proper fit, all-day comfort and personal style.

BALACLAVA
SHIELD THE ELEMENTS.
Keep your face and neck protected from harsh conditions with a balaclava. These are intentionally designed to keep you warm and comfortable with windproof material and an anti-fog design.

GOGGLES
EVERY DAY. ANY CONDITION.
We offer a range of styles to fit your look and lens color options to enhance your vision in virtually any light condition.

LAYERING
LAYER ON THE WARMTH.
Choose the right layers for your conditions. Start with our moisture-wicking base layers to help maintain proper body temperature, then add middle insulating or a heated layer depending on the weather.

JACKET **TECH54**
OWN THE EXTREMES.
All of our riding jackets are purpose built by our own team of technical experts to provide cold weather comfort, flexibility and a wide range of motion.

GLOVES **TECH54**
GRAB HOLD OF THE ADVENTURE.
All our gloves are designed to keep the bitter cold out using a powerful combination of insulated materials and moisture-wicking linings.

BIBS **TECH54**
LIVE IN YOUR ELEMENT.
Warmth, comfortable fit, and flexibility are key in choosing the right bibs. Polaris bibs provide a wider range of motion in the knees, thighs and waist to move with you as you ride.

BOOTS **TECH54**
PERFORMANCE, WARMTH AND COMFORT.
Cold feet ruin more snowmobile rides than anything else. Stay warm and dry all day with the Switchback 3.0 Boot which features hypergrip traction and a BOA® lacing system for easy on and off.

TECH54

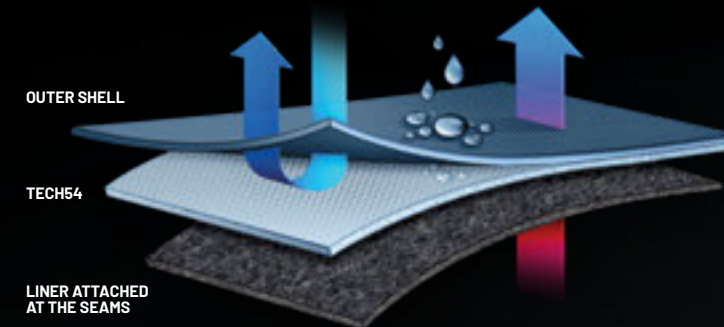

TECHNOLOGY TO OWN THE EXTREMES

STAY WARM AND DRY IN RIDING GEAR WITH TECH 54.

Our Apparel Center of Excellence developed TECH54—a waterproof, breathable membrane featured in every Polaris jacket, bib and monosuit. This exclusive technology allows perspiration to escape and keeps water out, so no matter how you ride, or where you ride, you stay dry, warm and comfortable.

WATERPROOF/BREATHABLE

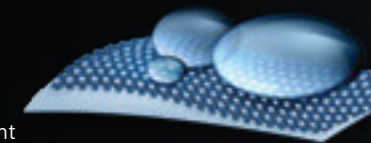

TECH54 is our single-layer bonded laminate technology that brings waterproof breathability and riding comfort to a new level in every Polaris jacket and bib.

DWR

RESIST MOISTURE

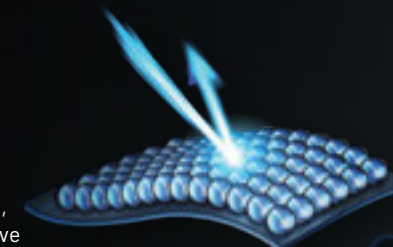

Every Polaris jacket and bib is treated with a DWR (Durable Water Repellent) coating to prevent precipitation so your gear doesn't get soggy. The DWR coating causes water to bead up and run off, keeping you comfortable and dry.

3M Scotchlite™ Reflective Material

RIDE SAFER

Proven in every weather condition, patented 3M® Scotchlite® Reflective Material is placed meticulously on each garment and nighttime tested to provide visibility from every angle.

YKK ZIPPERS

STAY PROTECTED

Quality construction you can trust.

3M THINSULATE™ Insulation

BE WARMER

3M® Thinsulate® Insulation is zonally mapped on insulated apparel to provide extra insulation in high wind exposure areas.

HOW IT WORKS TO ELEVATE YOUR RIDE.

5k/5k, 10k/10k or 20k/20k

WATERPROOF

The first number (5k, 10k or 20k) refers to the waterproof rating.

BREATHABILITY

The second number (5k, 10k or 20k) refers to how much water vapor the material can expel through the outerwear to release heat—and keep you dry from the inside.

DIFFERENT RATINGS FOR DIFFERENT RIDES

Choose your TECH54 rating based on the weather conditions and your level of exertion.

5k/5k: best for colder and drier snow conditions and moderate activity.

10k/10k: best for wet snow conditions and high-activity riding.

20k/20k: best for extremely wet snow conditions and the most aggressive riding.

GLOSSARY

ACCESSORIES + GARAGE

LOCK & RIDE FLEX

The fastest attachment system designed for tunnel-mounted snow accessories. Adapter kit sold separately to update a Lock & Ride attachment system to the Lock & Ride Flex system.

LOCK & RIDE

For Snow Accessories, a T-Slot tunnel attachment system.

CAMSO®

Customer-focused, world-class manufacturer and supplier of high-performance snowmobile tracks.

APPAREL

MOUNTAIN APPAREL

Uninsulated outerwear made of TECH54 20k/20k material.

CROSSOVER APPAREL

Insulated outerwear made of TECH54 10k/10k material.

TRAIL APPAREL

Insulated outerwear made of TECH54 5k/5k material.

DOT & ECE 22.06 CERTIFIED

The Department of Transportation (DOT) standard is enforced by the National Highway Traffic Safety Administration (NHTSA). For a helmet to be DOT-certified, it must pass a series of impact tests.

ECE 22.06

The Economic Commission for Europe (ECE) standard, R 22.06, is the most common helmet standard used internationally, as it is recognized by over 50 countries. To be ECE 22.06 certified, the helmet must pass a series of rigorous tests by an independent third-party lab.

3M® THINSULATE® INSULATION

3M® Thinsulate® Insulation is warm yet lightweight, powerful yet thin. It helps trap body heat while allowing moisture to escape.

3M® SCOTCHLITE® REFLECTIVE MATERIAL

Patented 3M® Scotchlite® Reflective Material provides nighttime visibility from every angle.

TECH54

A waterproof and breathable membrane bonded to the shell fabric to block moisture from entering while allowing vapor moisture to escape from the inside.

YKK® ZIPPERS

The YKK® Fastening Products Group is trusted worldwide for impeccable production standards and thorough quality control processes for slide fasteners, plastic hardware, hook-and-loop fasteners, webbing tapes and snap-and-button products.

SUPERIOR DURABLE WATER REPELLENCY

A Superior DWR coating causes water to bead up and run off, preventing precipitation from saturating the exterior of an outerwear piece.

BOA® LACING SYSTEM

The BOA® lacing system is easier to get on and off than traditional lace-up boots. Simply push to engage, turn to tighten and pull for quick release.

ROSEAU MINNESOTA SINCE 1954

This isn't nostalgia. It's heritage that still leads. Polaris built its first snowmobile in 1954 and never stopped rewriting what's possible. Every new idea, every next-level ride, every new technology—born from the same hands that started it all. Others follow. We set the standard. Just like we always have.
